

Privacy Enhancing Technologies

Third International Workshop, PET 2003, Dresden, Germany, March 26-28, 2003,
Revised Papers

PET 2003 was the 3rd Workshop on Privacy Enhancing Technologies. It all started in 2000 with Hannes Federrath organizing "Designing Privacy Enhancing Technologies: Workshop on Design Issues in Anonymity and Unobservability," July 25–26, 2000, held at the Computer Science Institute (ICSI), Berkeley, CA (LNCS 2009). Roger Dingledine, Adam Shostack, and Paul Syverson continued in April 2002 in San Francisco (PET 2002, LNCS 2482). This year was Dresden, and as long as the new PET field prospers, we intend to hold this workshop annually. The workshop focused on the design and realization of anonymity and censorship services for the Internet and other communication networks. Besides the excellent technical papers, we had four panels, led by Richard Clayton, - drei Serjantov, Marit Hansen, and Allan Friedman. This year we also extended our work-in-progress talk schedule, allowing 24 people from the audience to introduce a variety of new technologies and perspectives. An event like PET 2003 cannot happen without the work and dedication of many individuals. First we thank the authors, who wrote and submitted 52 full papers. Next the program committee, who wrote 163 reviews and -

lected 14 papers for presentation and publication, with additional reviewing help from Peter Berlich, Oliver Berthold, Steve Bishop, Jan Camenisch, Sebastian Clauß, Allison Clayton, George Danezis, Christian Friberg, Philippe Golle, Mike Gurski, Guenter Karjoth, Dogan Kesdogan, Stefan Kopsell, " Thomas Kriegelstein, Heinrich Langos, Nick Mathewson, Richard E. Newman, Richard Owens, David Parkes, Peter Pietzuch, Sandra Steinbrecher, Nathalie Weiler, Matthew Wright, and Sheng Zhong.
