

Digital Documents: Systems and Principles

8th International Conference on Digital Documents and Electronic Publishing, DDEP 2000, 5th International Workshop on the Principles of Digital Document Processing, PODDP 2000, Munich, Germany, September 13-15, 2000, Revised Papers

This volume contains the proceedings of two recent conferences in the field of electronic publishing and digital documents: – DDEP 2000, the 8th International Conference on Digital Documents and Electronic Publishing, the successor conference to the EP conference series; and – PODDP 2000, the 5th International Workshop on the Principles of Digital Document Processing. Both conferences were held at the Technische Universität München, Munich, Germany in September 2000. DDEP 2000 was the eighth in a biennial series of international conferences organized to promote the exchange of novel ideas concerning the computer production, manipulation and dissemination of documents. This conference series has attempted to reflect the evolving nature and usage of documents by treating digital documents and electronic publishing as a broad topic covering many aspects. These aspects have included document models, document representation and document dissemination, dynamic and hyper-documents, document analysis and management, and wide-ranging applications. The papers presented at DDEP 2000 and in this volume reflect this broad view, and cover such diverse topics as hypermedia structure and design, multimedia authoring techniques and systems, document structure inference, typography, document management and adaptation, document collections and Petri nets. All papers were refereed by an international program committee.
