

Integrated Formal Methods

4th International Conference, IFM 2004, Canterbury, UK, April 4-7, 2004, Proceedings

The fourth conference in the series of international meetings on Integrated Formal Methods, IFM, was held in Canterbury, UK, 4-7 April 2004. The conference was organized by the Computing Laboratory at the University of Kent, whose main campus is just outside the ancient town of Canterbury, part of the county of Kent. Kent is situated in the southeast of England, and the university sits on a hill overlooking the city of Canterbury and its world-renowned cathedral. The University of Kent was granted its Royal Charter in 1965. Today there are almost 10,000 full-time and part-time students, with over 110 nationalities represented. The IFM meetings have proven to be particularly successful. The first meeting was held in York in 1999, and subsequently we held events in Germany in 2000, and then Finland in 2002. The conferences are held every 18 months or so, and attract a wide range of participants from Europe, the Americas, Asia and Australia. The conference is now firmly part of the formal methods conference calendar. The conference has also evolved in terms of themes and subjects presented, and this year, in line with the subject as a whole, we saw more work on verification as some of the challenges in this subject are being met. The work reported at IFM conferences can be seen as part of the attempt to manage complexity by combining paradigms of specification and design, so that the most appropriate design tools are used at different points in the life-cycle.
