

JDF

Process Integration, Technology, Product Description

Based on the Job Definition Format (JDF) new workflow concepts are developed which will help create integrated workflows in the graphic arts industry. These developments create new business opportunities that will lead to a cost reduction but also will entail risks. Starting with a comprehensive explanation of the new standard, information is offered that enables business executives to make sound decisions on software investments in the graphic arts industry. Available architectures and products are highlighted and benefits are described. The steps relevant for the process integration are discussed.
