

Artificial Intelligence and Simulation

13th International Conference on AI, Simulation, and Planning in High Autonomy Systems, AIS 2004, Jeju Island, Korea, October 4-6, 2004, Revised Selected Papers

The AI, Simulation and Planning in High Autonomy Systems (AIS) 2004 Conference was held on Jeju Island, Korea, October 4–6, 2004. AIS 2004 was the thirteenth in the series of biennial conferences on AI and simulation. The conference provided the major forum for researchers, scientists and engineers to present the state-of-the-art research results in the theory and applications of AI, simulation and their fusion. We were pleased that the conference attracted a large number of high-quality research papers that were of benefit to the communities of interest. This volume is the proceedings of AIS 2004. For the conference full-length versions of all submitted papers were refereed by the respective international program committee, each paper receiving at least two independent reviews. Careful reviews from the committee selected 77 papers out of 170 submissions for oral presentation. This volume includes the invited speakers' papers, along with the papers presented in the conference. In addition to the scientific tracks presented, the conference featured keynote talks by two invited speakers: Bernard Zeigler (University of Arizona, USA) and Norman Foo (University of New South Wales, Australia). We were grateful to them for accepting our invitation and for their talks. We also would like to express our gratitude to all contributors, reviewers, program committee and organizing committee members who made the conference very successful. Special thanks are due to Tae-Ho Cho, the Program Committee Chair of AIS 2004 for his hard work in the various aspects of conference organization. Finally, we would like to acknowledge partial financial support by KAIST for the conference. We also would like to acknowledge the publication support from Springer.
