

Information Security and Cryptology - ICISC 2004

7th International Conference, Seoul, Korea, December 2-3, 2004, Revised Selected Papers

This book constitutes the thoroughly refereed postproceedings of the 7th International Conference on Information Security and Cryptology, ICISC 2004, held in Seoul, Korea in December 2004. The 34 revised full papers presented have gone through two rounds of reviewing and improvement and were selected from 194 submissions. The papers are organized in topical sections on block ciphers and stream ciphers, public key cryptosystems, PKI and related implementations, digital signatures, elliptic curve cryptosystems, provable security and primitives, network security, steganography, and biometrics.

The 7th International Conference on Information Security and Cryptology was organized by the Korea Institute of Information Security and Cryptology (KIISC) and was sponsored by the Ministry of Information and Communication of Korea. The conference received 194 submissions, and the Program Committee selected 34 of these for presentation. The conference program included two invited lectures. Mike Reiter spoke on "Security by Design for Converged Mobile Devices." And Frank Stajano spoke on "Security for Ubiquitous Computing." We would like to first thank the many researchers from all over the world who submitted their work to this conference. An electronic submission process was available. The submission review process had two phases. In the first phase, Program Committee members compiled reports (assisted at their discretion by subreferees of their choice, but without interaction with other Program Committee members) and entered them, via a Web interface, into the Web Review software. We would like to thank the developers, Bart Preneel, Wim Moreau, and Joris Claessens. Without the Web Review system, the whole review process would not have been possible. In the second phase, Program Committee members used the software to browse each other's reports, and discuss and update their own reports. We are extremely grateful to the Program Committee members for their enormous investment of time, effort, and adrenaline in the difficult and delicate process of review and selection.
