

Computing in Algebraic Geometry

A Quick Start using SINGULAR

This book provides a quick access to computational tools for algebraic geometry, the mathematical discipline which handles solution sets of polynomial equations. Originating from a number of intense one week schools taught by the authors, the text is designed so as to provide a step by step introduction which enables the reader to get started with his own computational experiments right away. The authors present the basic concepts and ideas in a compact way.

Artikelnummer: 9783540289920

Medium: Buch

ISBN: 978-3-540-28992-0

Verlag: Springer

Erscheinungstermin: 02.03.2006

Sprache(n): Englisch

Auflage: 1. Auflage 2006

Serie: Algorithms and Computation in Mathematics

Produktform: Gebunden

Gewicht: 1450 g

Seiten: 328

Format (B x H): 160 x 241 mm
