

Logic Programming

21st International Conference, ICLP 2005, Sitges, Spain, October 2-5, 2005, Proceedings

This volume contains the proceedings of the 21st International Conference on Logic Programming which was held in Sitges (Barcelona), Spain, from October 2nd to 5th, 2005. The conference was colocated with the International Conference on Constraint Programming (CP 2005) and the following 6 post-conference workshops: – CICLOPS 2005: Colloquium on Implementation of Constraint and Logic Programming Systems – CSLP 2005: Constraint Solving and Language Processing – WCB 2005: Constraint Based Methods for Bioinformatics – WLPE 2005: Logic-Based Methods in Programming Environments – MoVeLog 2005: Mobile Code Safety and Program Verification Using Computational Logic Tools – CHR 2005: Constraint Handling Rules. The conference coincided with a solar eclipse, which occurred on October 3rd and was visible in Sitges. No conference activities were scheduled at the time of the eclipse to allow delegates to view this extraordinary astronomical event. Since the first conference that was held in Marseilles in 1982, ICLP has been the premier international conference for presenting research in logic programming. In this edition of the conference, extra attention was given to novel applications of logic programming and to work providing novel integrations of different areas. Colocation with CP 2005 further reinforced these themes, as it provided an opportunity for the exchange of ideas and cross-fertilization among two areas which have common roots. ICLP 2005 and CP 2005 shared the invited speakers to underscore this effort. ICLP 2005 broke new ground by holding a doctoral consortium for the first time in the ICLP series of conference.
