

Pattern Recognition and Machine Intelligence

First International Conference, PReMI 2005, Kolkata, India, December 20-22, 2005, Proceedings

CSCR, which is the first national center in the country in this domain, has many important objectives including distance learning, establishing linkage to premier institutes/industries, organizing specialized courses, as well as conducting fundamental research. The conference proceedings of PReMI-05, containing rigorously reviewed papers, is published by Springer in its prestigious Lecture Notes in Computer Science (LNCS) series. Different professional sponsors and funding agencies (both national and international) came forward to support this event for its success. These include, International Association of Pattern Recognition (IAPR); Web Intelligence Consortium (WIC); Institute of Electrical and Electronics Engineering (IEEE); International Center for Pure and Applied Mathematics (CIMPA), France; Webel, Government of West Bengal IT Company; Department of Science & Technology (DST), India; Council of Scientific & Industrial Research (CSIR), India. To encourage participation of bright students and young researchers, some fellowships were provided. I believe the participants found PReMI-05 an academically memorable and intellectually stimulating event. It enabled young researchers to interact and establish contacts with well-known experts in the field. I hope that you have all enjoyed staying in Calcutta (now Kolkata), the city of Joy.
