Languages, Compilers, and Tools for Embedded Systems

ACM SIGPLAN Workshop LCTES 2000, Vancouver, Canada, June 18, 2000, Proceedings

53,49 €
49,99 € (zzgl. MwSt.)

Lieferfrist: bis zu 10 Tage

This volume contains the proceedings of the ACM SIGPLAN Workshop on L- guages, Compilers, and Tools for Embedded Systems (LCTES 2000), held June 18, 2000, in Vancouver, Canada. Embedded systems have developed consid- ably in the past decade and we expect this technology to become even more important in computer science and engineering in the new millennium. Interest in the workshop has been con rmed by the submission of papers from all over the world. There were 43 submissions representing more than 14 countries. Each submitted paper was reviewed by at least three members of the program committee. The expert opinions of many outside reviewers were in- luable in making the selections and ensuring the high quality of the program, for which, we express our sincere gratitude. The nal program features one invited talk, twelve presentations, and ve poster presentations, which re?ect recent - vances in formal systems, compilers, tools, and hardware for embedded systems. We owe a great deal ofthanks to the authors, reviewers, and the members of the program committee for making the workshop a success. Special thanks to Jim Larus, the General Chair of PLDI 2000 and Julie Goetz of ACM for all their help and support. Thanks should also be given to Sung-Soo Lim at Seoul National University for his help in coordinating the paper submission and review process. We also thank Professor Gaetano Borriello of the University of Washington for his invited talk on Chinook, a hardware-software co-synthesis CAD tool for embedded systems.
