

Java on Smart Cards: Programming and Security

First International Workshop, JavaCard 2000 Cannes, France, September 14, 2000
Revised Papers

The PACAP Prototype: A Tool for Detecting Java Card Illegal Flow. 25 P. Bieber, J. Cazin, A. ElMarouani, P. Girard, J.-L. Lanet, V. Wiels, G. Zanon CardKt: Automated Multi-modal Deduction on Java Cards for Multi-application Security. 38 Rajeev Gore, LanDuy Nguyen A Programming and a Modelling Perspective on the Evaluation of Java Card Implementations. 52 Pieter H. Hartel, Eduard de Jong Secure Internet Smartcards. 73 Naomaru Ito, Tomoko Fukuzawa, Peter Honeyman Issues in Smartcard Middleware. 90 Roger Kehr, Michael Rohs, Harald Vogt Open Platform Security. 98 Marc Kekiche, Forough Kashef, David Brewer A Simple(r) Interface Distribution Mechanism for Java Card. 114 Ksheerabdh Krishna, Michael Montgomery Automatic Test Generation for Java Card Applets. 121 Hugues Martin, Lydieu Bousquet Formal Specification and Verification of Java Card's Application Identifier Class. 137 Joachim vanden Berg, Bart Jacobs, Erik Poll X Table of Contents Security on Your Hand: Secure Filesystems with a "Non-cryptographic" JAVA-Ring. 151 Rüdiger Weis, Bastiaan Bakker, Stefan Lucks Author Index. 163 Formal Methods in Context: Security and Java Card D. Bolignano, D. Le Métayer, and C. Loiseaux Trusted Logic www.trusted-logic.fr 1. Security and Java Card: An Ideal Application Area for Formal Methods The benefits of formal methods for software engineering have been described at length in many research papers. They include among others: Better understanding and improved communication through unambiguous descriptions. Early bug detection thanks to the formalisation of specifications.

Invited Talk.- Formal Methods in Context: Security and Java Card.- Contributed Papers.- A Dynamic Logic for the Formal Verification of Java Card Programs.- The PACAP Prototype: A Tool for Detecting Java Card Illegal Flow.- CardKt: Automated Multi-modal Deduction on Java Cards for Multi-application Security.- A Programming and a Modelling Perspective on the Evaluation of Java Card Implementations.- Secure Internet Smartcards.- Issues in Smartcard Middleware.- Open Platform Security.- A Simple(r) Interface Distribution Mechanism for Java Card.- Automatic Test Generation for Java Card Applets.- Formal Specification and Verification of Java Card's Application Identifier Class.- Security on Your Hand: Secure Filesystems with a "Non-cryptographic" JAVA-Ring.
