

Information-Spectrum Methods in Information Theory

From the reviews: "This book nicely complements the existing literature on information and coding theory by concentrating on arbitrary nonstationary and/or nonergodic sources and channels with arbitrarily large alphabets. Even with such generality the authors have managed to successfully reach a highly unconventional but very fertile exposition rendering new insights into many problems." -- MATHEMATICAL REVIEWS

1 Source Coding.- 2 Random Number Generation.- 3 Channel Coding.- 4 Hypothesis Testing.- 5 Rate-Distortion Theory.- 6 Identification Code and Channel Resolvability.- 7 Multi-Terminal Information Theory.- References.

Artikelnummer: 9783540435815

Medium: Buch

ISBN: 978-3-540-43581-5

Verlag: Springer

Erscheinungstermin: 08.10.2002

Sprache(n): Englisch

Auflage: 1. Auflage 2002

Serie: Stochastic Modelling and Applied Probability

Produktform: Gebunden

Gewicht: 2120 g

Seiten: 538

Format (B x H): 160 x 241 mm
