

Dynamic Planet

Monitoring and Understanding a Dynamic Planet with Geodetic and Oceanographic Tools

Part I Joint IAG/IAPSO Papers.- Part II Frontiers in the analysis of space geodetic measurements.- Part III Gravity field determination from a synthesis of terrestrial, satellite, airborne and altimetry measurements.- Part IV Earth Processes: geodynamics, tides, crustal deformation and temporal gravity changes.- Part V Advances in the realization of global and regional reference frames.- Part VI GGOS: Global Geodetic Observing System.- Part VII Systems and methods for airborne mapping, geophysics and hazards and disaster monitoring.- Part VIII Atmospheric studies using space geodetic techniques.- Part IX Geodesy of the planets.

Artikelnummer: 9783540493495
Medium: Buch
ISBN: 978-3-540-49349-5
Verlag: Springer
Erscheinungstermin: 27.11.2006
Sprache(n): Englisch
Auflage: Erscheinungsjahr 2006
Serie: International Association of Geodesy Symposia
Produktform: Gebunden
Gewicht: 2377 g
Seiten: 909
Format (B x H): 208 x 282 mm
