

Local Area Network Security

Workshop LANSEC '89. European Institute for System Security (E.I.S.S.) Karlsruhe, FRG, April 3-6, 1989. Proceedings

Why is a LAN a LAN?.- Architectural considerations for LAN security protocols.- The impact of security service selection for LANs.- Access control and authentication in LANs.- Secure relays: An alternative approach to LANSEC.- MAC layer security measures in local area networks.- OSI network security and the NTCB.- A security related architecture for a TNB supporting confidentiality and integrity based policies.- Covert channels in LAN protocols.- Encapsulation security protocol design for local area networks.- Modeling A LAN security server.- Network management and diagnostics for secure LANs.
