Natural Language and Logic

International Scientific Symposium, Hamburg, FRG, May 9-11, 1989. Proceedings

This volume contains the papers presented at the International Scientific Symposium "Natural Language and Logic" held in Hamburg in May 1989. The aim of the papers is to present and discuss latest developments in the application of logic-based methods for natural language understanding. Logic-based methods have gained in importance in the field of computational linguistics as well as for representing various types of knowledge in natural language understanding systems. The volume gives an overview of recent results achieved within the LILOG project (LInguistic and LOGic methods for understanding German texts) - one of the largest research projects in the field of text understanding - as well as within related natural language understanding systems.

This volume contains the papers presented at a symposium on the application of logic-based methods for natural language understanding. Emphasis is put in use of the methods of computational linguistics and knowledge representation in natural language systems.
