

Parallelization in Inference Systems

International Workshop, Dagstuhl Castle, Germany, December 17-18, 1990. Proceedings

This volume contains the proceedings of an international workshop on parallelism in inference systems held in Germany in December 1990. The topic of the workshop is still rather young and several papers in the book are overview articles intended to provide a first orientation toward some of the more intensively investigated subtopics. The main part of the book is a compilation of research papers on parallelization in special domains of inference such as rewriting, automatic reasoning, logic programming, and connectionist inference. Appended to the book is a collection of short project summaries received in response to a worldwide email call. The book is intended primarily for researchers working on inference systems who are interested in parallelizing their systems.
