

Network Optimization

Network optimization is important in the modeling of problems and processes from such fields as engineering, computer science, operations research, transportation, telecommunication, decision support systems, manufacturing, and airline scheduling. Recent advances in data structures, computer technology, and algorithm development have made it possible to solve classes of network optimization problems that until recently were intractable. The refereed papers in this volume reflect the interdisciplinary efforts of a large group of scientists from academia and industry to model and solve complicated large-scale network optimization problems.

Artikelnummer: 9783540625414

Medium: Buch

ISBN: 978-3-540-62541-4

Verlag: Springer

Erscheinungstermin: 17.04.1997

Sprache(n): Englisch

Auflage: 1. Auflage 1997

Serie: Lecture Notes in Economics and Mathematical Systems

Produktform: Kartoniert

Gewicht: 1530 g

Seiten: 488

Format (B x H): 155 x 235 mm
