Structures and Structure Determination

Molecular Sieves - Science and Technology will cover, in a comprehensive manner, the science and technology of zeolites and all related microporous and mesoporous materials. Authored by renowned experts, the contributions will be grouped together topically in such a way that each volume of the book series will be dealing with a specific sub-field. **Volume 2** covers both the description of the various, complementary techniques for structure determination of microporous and mesoporous matter and their applications illustrated by a large number of pertinent examples. It also deals with general aspects of structures and structure distortions of microporous materials. In summary, Volume 2 provides the researchers in the field of zeolites and related materials with the indispensable knowledge of the great potential of modern methods for structure analysis.

Artikelnummer: 9783540643333
Medium: Buch
ISBN: 978-3-540-64333-3
Verlag: Springer
Erscheinungstermin: 01.06.1999
Sprache(n): Englisch
Auflage: 1999
Serie: Molecular Sieves
Produktform: Gebunden
Gewicht: 466 g
Seiten: 217
Format (B x H): 160 x 241 mm
