

Data Analysis, Classification, and Related Methods

This volume contains a selection of papers presented at the Seven-h Conference of the International Federation of Classification Societies (IFCS-2000), which was held in Namur, Belgium, July 11-14, 2000. From the originally submitted papers, a careful review process involving two reviewers per paper, led to the selection of 65 papers that were considered suitable for publication in this book. The present book contains original research contributions, innovative applications and overview papers in various fields within data analysis, classification, and related methods. Given the fast publication process, the research results are still up-to-date and coincide with their actual presentation at the IFCS-2000 conference. The topics captured are: • Cluster analysis • Comparison of clusterings • Fuzzy clustering • Discriminant analysis • Mixture models • Analysis of relationships data • Symbolic data analysis • Regression trees • Data mining and neural networks • Pattern recognition • Multivariate data analysis • Robust data analysis • Data science and sampling The IFCS (International Federation of Classification Societies) The IFCS promotes the dissemination of technical and scientific information data analysis, classification, related methods, and their applications.

This volume contains a selection of papers presented at the Seven-h Conference of the International Federation of Classification Societies (IFCS-2000), which was held in Namur, Belgium, July 11-14, 2000. From the originally submitted papers, a careful review process involving two reviewers per paper, led to the selection of 65 papers that were considered suitable for publication in this book. The present book contains original research contributions, innovative applications and overview papers in various fields within data analysis, classification, and related methods. Given the fast publication process, the research results are still up-to-date and coincide with their actual presentation at the IFCS-2000 conference. The topics captured are: ∫ Cluster analysis ∫ Comparison of clusterings ∫ Fuzzy clustering ∫ Discriminant analysis ∫ Mixture models ∫ Analysis of relationships data ∫ Symbolic data analysis ∫ Regression trees ∫ Data mining and neural networks ∫ Pattern recognition ∫ Multivariate data analysis ∫ Robust data analysis ∫ Data science and sampling The IFCS (International Federation of Classification Societies) The IFCS promotes the dissemination of technical and scientific information data analysis, classification, related methods, and their applications.

Lieferfrist: bis zu 10 Tage

Artikelnummer: 9783540675211
Medium: Buch
ISBN: 978-3-540-67521-1
Verlag: J.B. Metzler
Erscheinungstermin: 21.06.2000
Sprache(n): Englisch
Auflage: Erscheinungsjahr 2000
Serie: Studies in Classification, Data Analysis, and Knowledge Organization
Produktform: Kartoniert
Gewicht: 668 g
Seiten: 428
Format (B x H): 155 x 235 mm
