Models in Software Engineering

Workshops and Symposia at MoDELS 2006, Genoa, Italy, October 1-6, 2006, Reports and Revised Selected Papers

This book constitutes the thoroughly refereed post-proceedings of 11 international workshops held as satellite events of the 9th International Conference on Model Driven Engineering Languages and Systems, MoDELS 2006, in Genoa, Italy, in October 2006 (see LNCS 4199). The 32 revised full papers were carefully selected for inclusion in the book. They are presented along with a doctorial and an educators' symposium section.

Followingtradition,MoDELS2006hostedanumberofworkshopsandsymposia. They provided collaborative forums for groups to conduct intensive discussions and complemented the main conference by focusing on important subject areas and enabling a high degree of interactivity. MoDELS 2006 featured 11 workshops and three symposia during the ?rst three days of the conference. In addition to the Doctoral and Educators s- posia, which were already successfully held in 2005, a symposium on UML semantics was held for the ?rst time at MoDELS 2006. Keeping a time-tested tradition of the MoDELS/UML series, I formed an - ternationalworkshopselectioncommitteecomposedofthe followingresearchers: – Jean-Michel Bruel (University of Pau, France) – Martin Glinz (Universit¨ at Zur ¨ ich, Switzerland) – Reiko Heckel (University of Leicester, UK) – Jens Jahnke (University of Victoria, Canada) – Hans Vangheluwe (McGill University, Canada) – Jon Whittle (George Mason University, USA) Out of 18 workshop proposals, we selected 11 workshops and the symposium on UML semantics. Because of the way the latter was organized we, as well as the symposium organizers, agreed that it ?tted more appropriately under the heading of a symposium. Six of the workshops have a history in the MoDELS/UML series and r- resented a continuation of ongoing discussions on established topics. The other ? ve workshops featured new topics, further broadening the scope of MoDELS, beyond its traditional focus on UML. We believe this blend of established and innovativeworkshopthemes madethe MoDELS2006workshopsandsymposiaa success worth attending. The summaries of all symposia and workshops plus - visedversionsofthetworespectivebestpapersareincludedintheseproceedings.
