

Information Security Practice and Experience

Third International Conference, ISPEC 2007, Hong Kong, China, May 7-9, 2007, Proceedings

The third international conference on Information Security Practice and Experience (ISPEC 2007) was held in Hong Kong, China, May 7 – 9, 2007. The conference was organized and sponsored by City University of Hong Kong. As applications of information security technologies become pervasive, issues pertaining to their deployment and operation are becoming increasingly important. ISPEC is an annual conference that brings together researchers and practitioners to provide a conference of new information security technologies, their applications and their integration with IT systems in various vertical sectors. In 2005 and 2006, the first and second conferences were held successfully in Singapore and Hangzhou, China, respectively. The conference proceedings were published by Springer in the Lecture Notes in Computer Science series. The Program Committee received 135 submissions, and accepted 24 papers for presentation. The final versions of the accepted papers, which the authors finalized on the basis of comments from the reviewers, are included in the proceedings. The entire reviewing process took nine weeks, each paper was carefully evaluated by at least three members from the Program Committee. The individual reviewing phase was followed by a Web-based discussion. Papers over which the reviewers significantly disagreed were further reviewed by external experts. Based on the comments and scores given by reviewers, the final decisions on acceptance were made. We appreciate the hard work of the members of the Program Committee and external referees, who gave many hours of their valuable time.
