

Computing and Combinatorics

13th Annual International Conference, COCOON 2007, Banff, Canada, July 16-19, 2007, Proceedings

The Annual International Computing and Combinatorics Conference is an annual forum for exploring research, development, and novel applications of computing and combinatorics. It brings together researchers, professionals and industrial practitioners to interact and exchange knowledge, ideas and progress. The topics cover most aspects of theoretical computer science and combinatorics related to computing. The 13th Annual International Computing and Combinatorics Conference (COCOON 2007) was held in Banff, Alberta during July 16–19, 2007. This was the first time that COCOON was held in Canada. We received 165 submissions, among which 11 were withdrawn for various reasons. The remaining 154 submissions under full consideration came from 33 countries and regions: Australia, Brazil, Canada, China, the Czech Republic, Denmark, Finland, France, Germany, Greece, Hong Kong, India, Iran, Ireland, Israel, Italy, Japan, the Netherlands, Norway, Pakistan, Poland, Romania, Russia, Slovakia, South Korea, Spain, Sweden, Switzerland, Taiwan, Turkey, the UK, the USA, and the US minor outlying islands. After a six-week period of careful reviewing and discussions, the program committee accepted 51 submissions for oral presentation at the conference. Based on the allocations, 1.08 of the accepted papers were from Australia, 7.67 from Canada, 3.08 from China, 1 from the Czech Republic, 2 from Denmark, 1 from France, 5.42 from Germany, 0.08 from Greece, 2.18 from Hong Kong, 0.33 from India, 0.17 from Ireland, 1.83 from Israel, 1.5 from Italy, 2.9 from Japan, 0.17 from the Netherlands, 2.67 from Norway, 0.
