

Evolution Algebras and their Applications

Behind genetics and Markov chains, there is an intrinsic algebraic structure. It is defined as a type of new algebra: as evolution algebra. This concept lies between algebras and dynamical systems. Algebraically, evolution algebras are non-associative Banach algebras; dynamically, they represent discrete dynamical systems. Evolution algebras have many connections with other mathematical fields including graph theory, group theory, stochastic processes, dynamical systems, knot theory, 3-manifolds, and the study of the Ihara-Selberg zeta function. In this volume the foundation of evolution algebra theory and applications in non-Mendelian genetics and Markov chains is developed, with pointers to some further research topics.

Lieferfrist: bis zu 10 Tage

Artikelnummer: 9783540742838

Medium: Buch

ISBN: 978-3-540-74283-8

Verlag: Springer

Erscheinungstermin: 18.10.2007

Sprache(n): Englisch

Auflage: 1. Auflage 2007

Serie: Lecture Notes in Mathematics

Produktform: Kartoniert

Gewicht: 236 g

Seiten: 133

Format (B x H): 155 x 235 mm
