

Computational Linguistics and Intelligent Text Processing

9th International Conference, CICLing 2008, Haifa, Israel, February 17-23, 2008, Proceedings

CICLing 2008 (www.CICLing.org) was the 9th Annual Conference on Intelligent Text Processing and Computational Linguistics. The CICLing conferences are intended to provide a wide-scope forum for the discussion of both the art and craft of natural language processing research and the best practices in its applications. This volume contains the papers accepted for oral presentation at the conference, as well as several of the best papers accepted for poster presentation. Other papers accepted for poster presentation were published in special issues of other journals (see the information on the website). Since 2001 the CICLing proceedings have been published in Springer's Lecture Notes in Computer Science series, as volumes 2004, 2276, 2588, 2945, 3406, 3878, and 4394. The book consists of 12 sections, representative of the main tasks and applications of Natural Language Processing: – Language resources – Morphology and syntax – Semantics and discourse – Word sense disambiguation and named entity recognition – Anaphora and co-reference – Machine translation and parallel corpora – Natural language generation – Speech recognition – Information retrieval and question answering – Text classification – Text summarization – Spell checking and authoring aid. A total of 204 papers by 438 authors from 39 countries were submitted for evaluation (see Tables 1 and 2). Each submission was reviewed by at least two independent Program Committee members. This volume contains revised versions of 52 papers by 129 authors from 24 countries selected for inclusion in the conference program (the acceptance rate was 25.5%).
