Shock Wave Science and Technology Reference Library, Vol.4

Heterogeneous Detonation

possibly the first article in the open literature that provides such a comprehensive summary of the unconfined spray detonation phenomenon and its various engineering approaches.

The "Shock Wave Science and Technology Reference Library" is a numbered and bound collection of specifically commissioned volumes on basic fundamental and applied aspects of shock wave science and technology. A unique collection, the library as a whole sets out to comprehensively and authoritatively cover and review at research level the subject matter with all its ramifications.
