

Recent Developments in High Temperature Superconductivity

Proceedings of the 1st Polish-US Conference Held at Wrocław and Duszniki Zdrój, Poland, 11-15 September 1995

This book contains review articles presenting the current status of high-temperature superconductivity research. The articles cover synthesis issues, materials properties and most fundamental theoretical problems. Applications of high-temperature superconductors are also reflected in several contributions. The book addresses researchers working in fundamental research in solid-state physics as well as engineers developing new materials for industrial applications.
