Transactions on Large-Scale Data- and Knowledge-Centered Systems LIV

Special Issue on Data Management - Principles, Technologies, and Applications

The LNCS journal Transactions on Large-scale Data and Knowledge-centered Systems focuses on data management, knowledge discovery, and knowledge processing, which are core and hot topics in computer science. Since the 1990s, the Internet has become the main driving force behind application development in all domains. An increase in the demand for resource sharing across different sites connected through networks has led to an evolution of data- and knowledge-management systems from centralized systems to decentralized systems enabling large-scale distributed applications providing high scalability.

This, the 54th issue of Transactions on Large-Scale Data and Knowledge-Centered Systems, contains three fully revised and extended papers and two additional extended keynotes selected from the 38th conference on Data Management - Principles, Technologies and Applications, BDA 2022. The topics cover a wide range of timely data management research topics on temporal graph management, tensor-based data mining, time-series prediction, healthcare analytics over knowledge graphs, and explanation of database query answers.

Lieferfrist: bis zu 10 Tage

Artikelnummer: 9783662680131
Medium: Buch
ISBN: 978-3-662-68013-1
Verlag: Springer
Erscheinungstermin: 22.09.2023
Sprache(n): Englisch
Auflage: 1. Auflage 2023
Serie: Lecture Notes in Computer Science
Produktform: Kartoniert
Gewicht: 230 g
Seiten: 133
Format (B x H): 155 x 235 mm
