

Transactions on Large-Scale Data- and Knowledge-Centered Systems LVI

Special Issue on Data Management - Principles, Technologies, and Applications

The LNCS journal Transactions on Large-scale Data and Knowledge-centered Systems focuses on data management, knowledge discovery, and knowledge processing, which are core and hot topics in computer science. Since the 1990s, the Internet has become the main driving force behind application development in all domains. An increase in the demand for resource sharing across different sites connected through networks has led to an evolution of data- and knowledge-management systems from centralized systems to decentralized systems enabling large-scale distributed applications providing high scalability.

This, the 56th issue of Transactions on Large-Scale Data- and Knowledge-Centered Systems, contains five fully revised and extended papers selected from the 39th conference on Data Management - Principles, Technologies and Applications, BDA 2023. The topics cover a wide range of timely data management research topics on adaptive learning, personal data management systems, topic discovery in large corpora, spatio-temporal query processing, and data generation.

Artikelnummer: 9783662696026

Medium: Buch

ISBN: 978-3-662-69602-6

Verlag: Springer

Erscheinungstermin: 21.07.2024

Sprache(n): Englisch

Auflage: 2024

Serie: Transactions on Large-Scale Data- and Knowledge-Centered Systems

Produktform: Kartoniert

Gewicht: 260 g

Seiten: 153

Format (B x H): 155 x 235 mm
