

Transactions on Large-Scale Data- and Knowledge-Centered Systems LVII

The LNCS journal Transactions on Large-scale Data and Knowledge-centered Systems focuses on data management, knowledge discovery, and knowledge processing, which are core and hot topics in computer science. Since the 1990s, the Internet has become the main driving force behind application development in all domains. An increase in the demand for resource sharing (e.g., computing resources, services, metadata, data sources) across different sites connected through networks has led to an evolution of data- and knowledge-management systems from centralized systems to decentralized systems enabling large-scale distributed applications providing high scalability.

This, the 57th issue of Transactions on Large-Scale Data and Knowledge-Centered Systems, contains five fully revised selected regular papers. Topics covered include leveraging machine learning for effective data management, access control models, reciprocal authorizations, Internet of Things, digital forensics, code similarity search, volunteered geographic information, and spatial data quality.

Artikelnummer: 9783662701423

Medium: Buch

ISBN: 978-3-662-70142-3

Verlag: Springer

Erscheinungstermin: 25.10.2024

Sprache(n): Englisch

Auflage: 2025

Serie: Transactions on Large-Scale Data- and Knowledge-Centered Systems

Produktform: Kartoniert

Gewicht: 260 g

Seiten: 151

Format (B x H): 155 x 235 mm
