Using Artificial Intelligence in Term Papers and Theses

A Practical Guide for Students with Actionable Recommendations, Prompt Examples, and Critical Reflections

In this book, students will find a structured guide to using AI chatbots such as ChatGPT in a focused and responsible way for term papers and theses. With practical examples, it supports every stage of the research and writing process—from topic selection and literature review to data analysis, academic writing, and final editing.

Clear instructions, prompt templates, and guidance on common pitfalls help students work more efficiently with AI, while improving rigor and overall quality. The book also explains how to maintain academic integrity when using AI through transparency, traceability, and genuine personal contribution.

An essential resource for students across all disciplines, it also supports instructors who want to guide learners confidently through the digital transformation.
