

Advanced Orthoptics

An Interprofessional Practical Guide

This specialist volume presents diagnostic and therapeutic approaches across a range of orthoptic practice settings. It focuses on topics that extend beyond standard orthoptic training and are typically covered in advanced professional development and continuing education programs. The practice-oriented presentation of the material enables readers to apply the concepts directly in their daily clinical work. In modern orthoptics, interprofessional collaboration is essential. Accordingly, the book highlights key interfaces with related professions and disciplines, providing insights into orthoptic practice as well as shared diagnostic and therapeutic approaches. It is written for experienced professionals in orthoptics, optometry, ophthalmology, neurology, child developmental psychology, and occupational therapy. Contents include - Visual Neurorehabilitation - Acquired Forms of Nystagmus and Disorders of Gaze Stabilization - Cerebral Visual Impairment - Myopia Management
