

Snøhetta – Schneekappe – nennt sich das 1989 von mehreren Architekten verschiedener Nationalitäten gegründete Büro für Architektur, Landschaft und alles, was damit zusammenhängt. Die Verknüpfung verschiedener Disziplinen auf gleichberechtigtem Niveau stellt den Kern ihrer Arbeit dar. Es geht um Teamwork und gegenseitige Wertschätzung. Eine lebenswerte Umwelt und gelungene Architektur kann – so Snøhetta – nur durch einen gemeinsamen Schaffensprozess entstehen, bei dem viel hinterfragt und immer wieder neu gedacht wird. So vielschichtig wie die Denkweise, so unterschiedlich die Projekte: Diese Monografie zeigt Projekte, die bei Detail veröffentlicht wurden – und enthält damit viele interessante Einblicke in die Philosophie von Snøhetta und ihre beeindruckenden Architekturen.

Snøhetta – snow cap – is the name of the architecture firm founded in 1989 by architects of different nationalities to deal with architecture, landscapes and everything else related to these fields. The linking of various disciplines on equal footing is at the heart of the work of this internationally active group of "professionals". According to Snøhetta, a livable environment and successful architecture can only come about through a common creative process in which much may and must be questioned and constantly reconsidered. A building is thus never just the work of an individual, but the result of many. As complex as its way of thinking, as varied as its projects, this monograph presents all projects that have been published in DETAIL in recent years.
