Instruments and Related Concepts at the Syntax-Semantics Interface

No detailed description available for "Instruments and Related Concepts at the Syntax-Semantics Interface".

This series Dissertations in Language and Cognition explores issues of mental representation, linguistic structure and representation, and their interplay. The research presented in this series is grounded in the idea explored in the Collaborative Research Center The structure of representations in language, cognition and science (SFB 991) that there is a universal format for the representation of linguistic and cognitive concepts.
