

Single and the City

What does the single life look like and does it have anything in common with what the media show? This question has caused much discussion on the Internet, in TV debates, in the press and on the radio. This book explores the issue of singles in big cities, their lifestyle and reasons for "flying solo". Singles talk about their expectations towards their potential partners and their idea of a great love. They share their thoughts on relationships. They also talk about the importance of having a professional career in their life, their passions, and about the advantages and disadvantages of being single. The book presents the similarities and differences between the singles, and explains why some of them are called "all-or-nothing" while others are called "accustomed" or "romantic".
