Bioethics Yearbook

Theological Developments in Bioethics: 1992-1994

As the field of bioethics has matured, increasing attention is being paid to how bioethical issues are treated in different moral and religious traditions and in different regions of the world. It is often difficult, however, to obtain timely information about these matters. The series analyzes how such issues as new reproductive techniques, abortion, maternal-fetal conflicts, care of seriously ill newborns, consent, confidentiality, equitable access, cost-containment, withholding and withdrawing treatment, euthanasia, the definition of death, and organ transplantation are being discussed in different religions and regions. Volume 5 discusses theological developments from 1992 to 1994 in Anglican, Baptist, Catholic, Hindu, Jehovah's Witness, Jewish, Latter-Day Saint, Lutheran, Methodist, Muslim, Pentecostal, and Presbyterian traditions.
