

Internationalizing Higher Education

Critical Explorations of Pedagogy and Policy

Globalization is a multifaceted phenomenon, and one of its major components is the internationalization of education. The increasing pace and complexity of global knowledge flows, and the accelerating exchange of educational ideas, practices and policies, are important drivers of globalization. Higher Education is a key site for these flows and exchanges. This book casts a critical eye on the internationalization of higher education. It peels back taken-for-granted practices and beliefs, explores the gaps and silences in current pedagogy and practices, and addresses the ambiguities, tensions and contradictions in internationalization. In this volume, scholars from a range of disciplines and regions critically examine the co modification of higher education, teaching and support for international students, international partnerships for aid and trade, and the impacts on academics work.
