

Peptides 1992

Proceedings of the Twenty-Second European Peptide Symposium September 13-19, 1992, Interlaken, Switzerland

These proceedings of the Twenty-Second European Peptide Symposium include 437 articles concerning peptide synthesis, rapid preparation/libraries, conformation, design, and biological physicochemical and immunological aspects. The symposium was held under the auspices of the newly founded European Peptide Society although it is clear that the contributions are international.

These proceedings of the Twenty-Second European Peptide Symposium include 437 articles concerning peptide synthesis, rapid preparation/libraries, conformation, de novo design, and biological physicochemical and immunological aspects. The symposium was held under the auspices of the newly founded European Peptide Society although it is clear that the contributions are de facto international.
