

Future Information Technology, Application, and Service

FutureTech 2012 Volume 2

This book is about Future Information Technology, Application, and Service (FutureTech 2012 volume 2). The topics of FutureTech 2012 cover the current hot topics satisfying the world-wide ever-changing needs.

The FutureTech 2012 is intended to foster the dissemination of state-of-the-art research in all future IT areas, including their models, services, and novel applications associated with their utilization. The FutureTech 2012 will provide an opportunity for academic and industry professionals to discuss the latest issues and progress in this area. In addition, the conference will publish high quality papers which are closely related to the various theories, modeling, and practical applications in many types of future technology. The main scope of FutureTech 2012 is as follows.

Hybrid Information Technology

Cloud and Cluster Computing

Ubiquitous Networks and Wireless Communications

Multimedia Convergence

Intelligent and Pervasive Applications

Security and Trust Computing

IT Management and Service

Bioinformatics and Bio-Inspired Computing

Database and Data Mining

Knowledge System and Intelligent Agent

Human-centric Computing and Social Networks

The FutureTech is a major forum for scientists, engineers, and practitioners throughout the world to present the latest research, results, ideas, developments and applications in all areas of future technologies.
