

Hyperbolic Differential Polynomials: And Their Singular Perturbations

Approach your problems from It isn't that they can't see the the right end and begin with the solution. It is that they can't see answers. Then, one day, perhaps the problem. you will find the final question. 'The Hermit Clad in Crane Feathers' G. K. Chesterton, The scandal of in R. Van Gulik's The Chinese Maze Father Brown 'The point of a Murders. pin" Growing specialization and diversification have brought a host of monographs and textbooks on increasingly specialized topics. However, the 'tree' of knowledge of mathematics and related fields does not grow only by putting forth new branches. It also happens, quite often in fact, that branches which were thought to be completely disparate are suddenly seen to be related. Further, the kind and level of sophistication of mathematics applied in various sciences has changed drastically in recent years: measure theory is used (non-trivially) in regional and theoretical economics; algebraic geometry interacts with physics; the Minkowsky lemma, coding theory and the structure of water meet one another in packing and covering theory; quantum fields, crystal defects and mathematical programming profit from homotopy theory; Lie algebras are relevant to filtering; and prediction and electrical engineering can use Stein spaces.

Artikelnummer: 9789400995086
Medium: Buch
ISBN: 978-94-009-9508-6
Verlag: SPRINGER PG
Erscheinungstermin: 31.10.2011
Sprache(n): Englisch
Auflage: Softcover Repri
Serie: Mathematics and Its Application
Produktform: Kartoniert
Gewicht: 274 g
Seiten: 168
Format (B x H): 152 x 223 mm
