

Interdisciplinary Approaches to Language

Essays in Honor of S.-Y. Kuroda

The thirty-two papers in this collection are offered to Professor S.-Y. Kuroda by his friends, as a gesture of their deep respect and enduring affection. One of the many ways in which Professor Kuroda has impressed us all is in the breadth of his interests and areas of expertise. He is one of those rare scholars whose work and interests span the whole range of his discipline. He is a figure of such intellectual stature that he has inspired, influenced, and encouraged researchers in an astonishing variety of projects. He continues to do so at an unslackened pace today, just as his own productivity remains vigorous. But mention of Yuki's inspiration and influence is inadequate without mention of his special humorousness, his mischievous wit, his charm and as a friend, has added a unique warmth. Knowing Yuki, and counting him quality to our lives. We who have contributed to this collection have done so in partial acknowledgement of, and gratitude for, this benign and masterful influence. The contributions to the collection reflect the range of Yuki's own interests, and cover a rich variety of approaches to the analysis of natural language. These include papers in philosophy, psychology, computer science, artificial intelligence, and linguistics, and, within linguistics, the entire breadth of the field: phonology, morphology, syntax, semantics, pragmatics, and computation. Though diverse in their themes, language areas, and foci, the papers are bound by their authors' common bond to Yuki.
