Computational Signal Processing and Analysis

Select Proceedings of ICNETS2, Volume I

This book comprises a collection of papers by international experts, presented at the International Conference on NextGen Electronic Technologies (ICNETS2-2017). ICNETS2 encompassed six symposia covering all aspects of electronics and communications engineering domains, including relevant nano/micro materials and devices. Featuring the latest research on computational signal processing and analysis, the book is useful to researchers, professionals, and students working in the core areas of electronics and their applications, especially signal processing, embedded systems, and networking.

Covers key developments in the field of electronics and communication engineeringIncludes latest research from field of Computational Signal Processing and AnalysisIncludes contributions from top researchers and experts
