Communication, Devices, and Computing

Proceedings of ICCDC 2017

This book provides insights into the First International Conference on Communication, Devices and Computing (ICCDC 2017), which was held in Haldia, India on November 2–3, 2017. It covers new ideas, applications and the experiences of research engineers, scientists, industrialists, scholars and students from around the globe. The proceedings highlight cutting-edge research on communication, electronic devices and computing, and address diverse areas such as 5G communication, spread spectrum systems, wireless sensor networks, signal processing for secure communication, error control coding, printed antennas, analysis of wireless networks, antenna array systems, analog and digital signal processing for communication systems, frequency selective surfaces, radar communication, and substrate integrated waveguide and microwave passive components, which are key to state-of-the-art innovations in communication technologies.

Artikelnummer: 9789811085840
Medium: Buch
ISBN: 978-981-10-8584-0
Verlag: Springer
Erscheinungstermin: 08.04.2018
Sprache(n): Englisch
Auflage: 1. Auflage 2017
Serie: Lecture Notes in Electrical Engineering
Produktform: Gebunden
Gewicht: 618 g
Seiten: 315
Format (B x H): 160 x 241 mm
