

Track-Before-Detect Using Expectation Maximisation

The Histogram Probabilistic Multi-hypothesis Tracker: Theory and Applications

This book offers a detailed description of the histogram probabilistic multi-hypothesis tracker (H-PMHT), providing an accessible and intuitive introduction to the mathematical mechanics of H-PMHT as well as a definitive reference source for the existing literature on the method. Beginning with basic concepts, the authors then move on to address extensions of the method to a broad class of tracking problems. The latter chapters present applications using recorded data from experimental radar, sonar and video sensor systems.

Artikelnummer: 9789811339714

Medium: Buch

ISBN: 978-981-13-3971-4

Verlag: Springer

Erscheinungstermin: 16.12.2018

Sprache(n): Englisch

Auflage: Softcover Nachdruck of the original 1. Auflage 2018

Serie: Signals and Communication Technology

Produktform: Kartoniert

Gewicht: 569 g

Seiten: 352

Format (B x H): 155 x 235 mm
