

Operationalising e-Democracy through a System Engineering Approach in Mauritius and Australia

This book describes how the Systems Engineering (SE) methodology can be used to harness technology and enhance democracy within any political system. Moreover, it provides a practical roadmap for countries and politicians who are willing to change their existing system of governance to one that allows the people to have a meaningful say. In this regard, the book compares and contrasts two countries, Mauritius and Australia, highlighting how SE and e-democracy can be implemented in different contexts.
