

Advances in Computational Intelligence Techniques

This book highlights recent advances in computational intelligence for signal processing, computing, imaging, artificial intelligence, and their applications. It offers support for researchers involved in designing decision support systems to promote the societal acceptance of ambient intelligence, and presents the latest research on diverse topics in intelligence technologies with the goal of advancing knowledge and applications in this rapidly evolving field. As such, it offers a valuable resource for researchers, developers and educators whose work involves recent advances and emerging technologies in computational intelligence.

Artikelnummer: 9789811526220

Medium: Buch

ISBN: 978-981-15-2622-0

Verlag: Springer

Erscheinungstermin: 21.02.2021

Sprache(n): Englisch

Auflage: 1. Auflage 2020

Serie: Algorithms for Intelligent Systems

Produktform: Kartoniert

Gewicht: 429 g

Seiten: 266

Format (B x H): 155 x 235 mm
