

Shipbuilding Management

This book highlights the main features of shipbuilding management which lead to successful completion of shipbuilding projects. A brief review of the market context for the industry, its historical development are given to explain how shipbuilding arrived at its current structure. First pre-production including design, planning, cost estimating, procurement of materials and sub-contracting. Then, the production sequence outlines part preparation, hull assembly and construction, outfitting and painting, testing and completion. The importance of human resources and management organisation are explained. Building a ship is a complex project, so the principles of project management are described, first in general terms and then with specific reference to their application in shipbuilding. Finally managing the progress of a shipbuilding project and achieving completion are emphasised.
