

Intelligent Computing and Communication Systems

This book discusses a number of intelligent algorithms which are being developed and explored for the next-generation communication systems. These include algorithms enabled with artificial intelligence, machine learning, artificial neural networks, reinforcement learning, fuzzy logic, swarm intelligence and cognitive capabilities. The book provides a comprehensive and insightful understanding of these algorithms, in context with their applications developed recently and also for immediate future communication technologies. It also covers the topics on how to develop intelligent algorithms for computing functionality in the end-to-end networking platforms. Moreover, the book also covers the recent developments, open technological challenges and future directions in the areas of data analysis, applications of the game theory, autonomous entities, evolutionary computation, smart ubiquitous computing and intelligent architectures with major focus on communication technologies and computing platforms.

Artikelnummer: 9789811612978

Medium: Buch

ISBN: 978-981-16-1297-8

Verlag: Springer

Erscheinungstermin: 23.06.2022

Sprache(n): Englisch

Auflage: 1. Auflage 2021

Serie: Algorithms for Intelligent Systems

Produktform: Kartoniert

Gewicht: 668 g

Seiten: 417

Format (B x H): 155 x 235 mm
