

Emerging Trends in Data Driven Computing and Communications

Proceedings of DDCIoT 2021

This book includes best selected, high-quality research papers presented at International Conference on Data Driven Computing and IoT (DDCIoT 2021) organized jointly by Geetanjali Institute of Technical Studies (GITS), Udaipur, and Rajasthan Technical University, Kota, India, during March 20–21, 2021. This book presents influential ideas and systems in the field of data driven computing, information technology, and intelligent systems.

Hybrid Deep Learning Model for Real-time Detection of Denial of Service Attacks in Software Defined Networks.- CP-ABE Scheme with Decryption Keys of Constant Size using ECC with Expressive Threshold Access Structure.- Facial Expressions Recognition Based on DRLBP and CNN Classification.- Post Stroke Readmission Prediction Model Using Machine Learning Algorithms.- Handwriting Recognition Using Deep Learning.- A Theoretical Approach to Reinforcement Learning Algorithm and Nash Equilibrium to Maximize the Score in Imperfect Information Game.- A Review Paper on Sign Language Recognition using Machine Learning Techniques.- Deep Learning Methods for the Prediction of Chronic Diseases: A systematic review.- Cyber Infrastructure for Advanced Research with High Performance Edge Computing.- A Literature Review on Machine Learning Techniques and Strategies Applied to Stock Market Price Prediction.

Lieferfrist: bis zu 10 Tage

Artikelnummer: 9789811639142

Medium: Buch

ISBN: 978-981-16-3914-2

Verlag: Palgrave Macmillan

Erscheinungstermin: 28.09.2021

Sprache(n): Englisch

Auflage: 1. Auflage 2021

Serie: Studies in Autonomic, Data-driven and Industrial Computing

Produktform: Gebunden

Gewicht: 717 g

Seiten: 354

Format (B x H): 160 x 241 mm
