

Teaching and Learning about Technological Systems

Philosophical, Curriculum and Classroom Perspectives

This book discusses the teaching and learning about technological systems in technology education and adjacent curriculum areas. It describes, analyzes and synthesizes contemporary research on technological systems in technology education. By delving into the philosophy, sociology and history of technology, technology education and the learning and teaching of technological systems, it summarizes prior research and analyzes new research. This book thereby serves as a resource and reference work for professionals in this area of research and education.
