

Distributed Computing and Optimization Techniques

Select Proceedings of ICDCOT 2021

This book introduces research presented at the International Conference on Distributed Computing and Optimization Techniques (ICDCOT-2021), a two-day conference, where researchers, engineers, and academicians from all over the world came together to share their experiences and findings on all aspects of distributed computing and its applications in diverse areas. The book includes papers on distributed computing, intelligent system, optimization method, mathematical modeling, fuzzy logic, neural networks, grid computing, load balancing, communication. It will be a valuable resource for students, academics, and practitioners in the industry working on distributed computing.
